***Allowable Subject Matter***

Claims 1-34 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-9 are allowed because they specifically require a detector means for detecting movement of a surface of the stack oriented parallel to the bed.

Claims 10-20 are allowed because they specifically require detecting the movement of the surface of the stack oriented parallel to the bed.

Claims 21-22 are allowed because they specifically require a detector defining a window for collecting energy from a target area substantially coincident with the surface of the stack oriented parallel to the planar surface.

Claims 23-27 are allowed because they specifically require detecting the movement of at least one of the stack surfaces oriented parallel to the horizontal planar surface.

Claims 28-30 are allowed because they specifically require optically observing a target area coincident with one of the stack surfaces oriented parallel to the planar surface to determine the magnitude of stack movement proximate to the planar surface.

Claims 31-34 specifically require a control means for causing the needle to execute cyclic movements at a rate substantially proportional to the rate of stack movement measured by the detector.

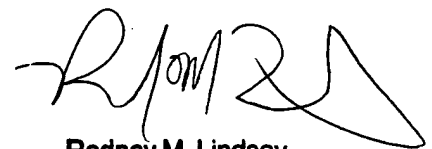

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
